

Fire Warden Training

It is a **legal requirement** under the Regulatory Reform (Fire Safety) Act 2006 that all employers provide their staff with **adequate fire safety** training tailored to the specific needs of their business premises.

Logic Fire and Security offer an interactive half-day course for businesses to train their staff to become fire wardens.

We are on hand to ensure that this training is provided to the highest standard; offering live fire training, extinguisher instruction and all evacuation protocols; teaching your staff skills that will sufficiently equip them to deal with fire emergency situations, whatever their existing level of fire safety knowledge.

The courses will take place during working hours and should be repeated periodically to meet regulations.

We provide fully insured training apparatus that our qualified operatives will handle.

The comprehensive programme will cover:

- **Fire Safety Legislation**
- **Action in the Event of a Fire**
- **Role of the Fire Warden**
- **Analysing video case studies**
- **Types of fire extinguishers, and how to use them.**

Logic
Fire and Security

Upon successful completion of the course, all delegates will be presented with full certification

Call **0845 999 3222** or email **info@logicfireandsecurity.com** for more information or to book your fire warden training today!
