

## WHY CHOOSE LOGIC?

Logic Fire and Security are third-party accredited for the design, maintenance and installation of Access Control Systems to NSI Gold Standard.

## ADVANTAGES

-  Can control which areas of the site different staff members have access to.
-  No need to change the locks or worry about keys being copied if staff leave the business.
-  No need to worry about the property being open to anyone.
-  Protocols can be set to allow doors to be open at certain times.
-  Fire registers can be generated quickly in the event of fire evacuation.

**An access control system allows control over who can access the premises.**

-  Can operate gates, doors and barriers.
-  Various installations, e.g. video and telephone entry systems, or computer-controlled systems operated by magnetic cards or proximity readers.

## Three types of Access Control system:

-  A stand alone system
  -  Simplest, most cost-effective.
-  A PC-Networked System
  -  Allows access to be tailored for each individual and is controlled via the relevant software.
-  A door entry system
  -  Enables entry for visitors who can't access the site via the access control system.
