

Excel Environ Locking Solutions

Excel is a world-class premium performance end-to-end infrastructure solution - designed, manufactured, supported and delivered - without compromise.

Environ Locking Solutions from Excel, in conjunction with Southco and Suprema, provide an ergonomic and stylish solution to environments where security is paramount. The solution can be standalone, networkable, integrate into Access Control systems, BMS and include Biometrics.

The Solution brings intelligence and monitoring right down to the lock level of a data rack, giving you ultimate control of access to the services and equipment within a communications room or data centre, making it perfect for co-location deployments and remote sites where access is restricted for authorised personnel only.

RFID Intelligent		Compatibility
<p>The Lock with built in RFID reader is the ultimate in data rack security. This lock provides intelligence and monitoring, allowing for remote locking and unlocking, with built in integral key lock for manual override. This solution is offered as a fitted handle to a complete rack.</p>		<p>SR – front door SR – rear door ER – front door ER – rear door</p>
Biometric Intelligent		Compatibility
<p>Remove the possibility of fraudulent access through mislaid keys or corrupt activity, with biometric readers within the lock. The Solution is data centre centric with the market shift towards cloud, colocation and managed service offerings, where multiple clients are facilitated. This solution is offered as a fitted handle to a complete rack.</p>		<p>CL – front door CL – rear door ER – front door CR – front door</p>
Standalone Combination and RFID Locks		Compatibility
<p>Have up to 20 unique combination codes or access cards on each lock with the standalone solution, on any of the latch mechanism doors with the CR, ER and CL series racks. This self contained system is locally powered through a 3AA battery power pack. The system is easily programmed with a management key and has activation life cycle of circa 50,000 operations. This solution is offered as piece part for retro fitting to a rack or can be supplied fitted.</p>		<p>CL – front door CL – rear door ER – front door CR – front door</p>
