

# EMERGENCY LIGHTING

## WHY IS IT NEEDED?

💡 Emergency lighting provides safe evacuation when mains power fails.

💡 Conforms with The Regulatory Reform (Fire Safety) Order 2005.

## WHY CHOOSE LOGIC?

Logic Fire and Security are third-party accredited for the maintenance of emergency lights to BAFE and NSI Gold Standard.

Emergency lighting is required to ensure lighting is provided promptly, automatically and for a suitable time when the normal (mains) power fails to ensure people within the building can evacuate safely in the event of an emergency.

In a poorly lit building, failure to have the correct lighting could result in serious injuries, or even death if people are unable to easily locate the nearest fire exits when evacuating the building in an emergency.

### Maintained Fitting

Lamp is on all the time and will stay illuminated when mains power supply fails (at a lower light level).

### Non-Maintained Fitting

Lamp only turns on when power supply to usual lighting fails.
